### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

On line 1 of paragraph 14, "FIG. 4 depicts" has been replaced by "FIGS. 4A and 4B depict".

On line 1 of paragraph 15, "FIG. 5 depicts" has been replaced by "FIGS. 5A and 5B depict".

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record teach or suggest an apparatus for supporting a preform, comprising: a shaft defining a groove; a deformable element arranged in the groove; a split ring having at least two sections each having an inner surface facing the deformable member and an outer surface, at least one of the sections having a protrusion extending from its inner surface, the protrusion being arranged adjacent to the deformable element, and the split ring being movable in a radial direction whereby the protrusion causes the deformable element to be compressed in the groove. The closest prior art (Pellagatta et al 6,761,556) discloses a split ring (30) and a deformable element (32) in a groove to support a preform, but the reference does not disclose or suggest at least

one section of the split ring having a protrusion extending from its inner surface, the protrusion being adjacent to the deformable element. Nothing in the reference suggests a projection on the inner surface of the split ring to allow the apparatus to support different preforms having different inner diameter necks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
